CLOSING REMARKS--SIXTH VERTEBRATE PEST CONFERENCE

CHARLES C. SIEBE, Program Supervisor, Department of Food and Agriculture, Sacramento, California

On behalf of the California Vertebrate Pest Committee I would like to thank you for the interest and attention that you have shown throughout this Conference.

It is the participation of those interested in vertebrate pest control that make for the success or failure of our Conference.

We have had participation during this Conference from people from ten foreign countries and twenty-seven states.

We are especially appreciative of the interest and cooperation of personnel from the County Agricultural Commissioners Offices in California. These people are the backbone of field rodent control in California and we have representatives here from twenty-six California counties.

The date and place of the next Conference has not at this time been decided. We will announce this at a later date.

Again, we thank you for your attendance and wish you a safe and pleasant journey home.
